## **DETAILED ACTION**

## Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim 1, drawn to a pulse tube refrigerator having a vacuum insulation chamber and a buffer tank therein.

Group II, claim 2, drawn to a pulse tube refrigerator having an inertance tube within the vacuum insulation chamber.

Group III, claims 3-5, drawn to a pulse tube refrigerator having two pulse tubes, two inertance tubes, two buffer tanks, and a cooling element in contact with the second inertance tube.

The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

In view of the fact that Roohana (JP2001304708) teaches a pulse tube refrigerator, (Figure 1) comprising: a pressure-waveform generating device (1) for generating a pressure waveform of refrigerant gas; a pulse tube (3) into which refrigerant gas with the pressure waveform generated by said pressure-waveform generating device (1) flows, one of whose ends is adapted to a low-temperature end, and the other one of whose ends is adapted to a high-temperature end; a cold accumulator (2) disposed between said pressure-waveform generating device (1) and

Application/Control Number: 10/550,526

Art Unit: 3744

said pulse tube (3), and pre-cooling the refrigerant gas to be flowed into said pulse tube; a pressure-waveform phase controlling element (8, 4, 6, 7) having a buffer tank (5) communicating with the high-temperature end of said pulse tube (3), and controlling a pressure-waveform phase of the refrigerant gas for generating refrigeration at the low-temperature end of said pulse tube (3), it is clear that such common features between the claimed groups are not special technical features and therefore a lack of unity exists between the groups I, II, and III.

Page 3

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John F. Pettitt whose telephone number is 571-272-

0771. The examiner can normally be reached on M-F 8a-4p.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl Tyler or Frantz Jules can be reached on 571-272-4834 or 571-272-6681. The fax phone number for the organization where this application or proceeding

is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
